

## Education

- **Guangzhou University** Guangzhou, China  
*B.S. in Computer Science* 2016 - 2020  
– GPA: 88/100 (Ranking: 3/101)
- **Shenzhen University** Shenzhen, China  
*M.S. in Computer Science* 2020 - 2023  
– GPA: 87/100 (Ranking: 6/76)  
– Supervisor: Prof. Weicheng Xie and Prof. Linlin Shen  
– Research Interests: 3D reconstruction & Generative model & Human-centric visual analysis

## Awards, Grants & Honors

<b>China National Scholarship <math>\leq 0.02\%</math></b>	2022
Excellent Academic Scholarship, First Prize	2022
Excellent Academic Scholarship, Special Prize	2021
Excellent Academic Scholarship, First Prize	2020
Excellent Academic Scholarship, First Prize	2019
"Lanqiao" Programming Competition in Guangdong Province, First Prize	2019
Excellent Academic Scholarship, Second Prize	2018

## Research Experience

- Affective Intelligence & Robotics Lab** **University of Cambridge**  
*Supervised by Prof. Hatice Gunes* *Jul., 2022 - Dec., 2022*
  - **Topic: Facial Reaction Generation in Dyadic Interactions.** We're trying to construct a new visual field of generating a listener's facial reactions in dyadic interactions and organized a grand challenge on ACM MM conference.
- Computer Vision Technology (VIS)** **Baidu, Inc.**  
*Supervised by Dr. Hang Zhou* *Oct., 2022 - Jun., 2023*
  - **Topic: 3D Morphable Model.** We're trying to design a 3D Morphable Model (3DMM) to accurately capture expressions of a facial display and retarget them to a virtual 3D avatar.
- Monash Medical AI Group** **Monash University**  
*Supervised by Prof. Zongyuan Ge* *Aug. 2023 - Present*
  - **Topic 1 : Generative AI.** My research revolves around designing novel generative models that can produce multi-model outputs including video, audio, texts and can be applied in human-computer interactions and mental healthcare.

- **Topic 2 : Drug Discovery.** My research revolves around exploring generative models for AI-guided design and optimization of G Protein-coupled Receptor (GPCR) biased agonists.

## Computer Vision Institute

*Supervised by Prof. Weicheng Xie and Prof. Linlin Shen*

## Shenzhen University

*2020 - 2023*

- **Topic 1 : Human Behavior Analysis.** We focus on using GNN to model the complex relationship between facial action units. A multi-dimensional edge feature-based graph is proposed, which is different from conventional single value edge-based graphs. This special graph can automatically learn unique edge features to define the comprehensive relationship between each AU pair. This paper was accepted by IJCAI-ECAI 2022 and open source.
- **Topic 2: Adversarial Learning.** We focus on two open problems in adversarial attack: imperceptibility to the human visual system (HVS) and transferability. We propose a novel adversarial attack to generate transferable perturbations across both architectures and datasets and limit perturbations into high-frequency components, which are imperceptible to HVS but can largely determine the prediction results of models. This paper was accepted by CVPR 2022 and open source.
- **Topic 3: Weakly Supervised Learning.** We focus on model training without massive manual annotations. We present a novel framework for object localization with only image-level supervision. Different from previous works based on **high-level CAMs** (Class Activation Maps), our method tends to refine **low-level object feature maps** and can obtain a well-separated, complete, and compact activation map of objects in the image. This paper was accepted by **ICCV 2021** and open source.

## Participation in Conferences and Programs

- |  |                         |
|--|-------------------------|
| • <b>IJCAI 2022</b>  | Virtual Conference      |
| • <i>International Joint Conference on Artificial Intelligence</i> | <i>Jul. 23-29, 2022</i> |
| • <b>CVPR 2022</b>   | Virtual Conference      |
| • <i>Computer Vision and Pattern Recognition</i>                   | <i>Jun. 21-24, 2022</i> |
| • <b>Robotic Design and AI Program</b>                             | Seattle America         |
| • <i>International Program Held by University of Washington</i>    | <i>Jul. 22-31, 2019</i> |

## Skills

- Programming languages: C/C++, Python, Assembly Language, HTML/CSS, JavaScript
- Library/Toolkit: PyTorch, OpenCV
- Tools: Vim, Latex, Photoshop, Premiere

## Academic Activity
